

# AI agent & vertical SaaS seed pitch brief (Template & Video Brief)

Structure a 60-90 second seed pitch video for an AI agent or vertical workflow SaaS. Covers human-in-the-loop guardrails, bounded pilot metrics, unit economics after inference cost, and seed ask.

## AI agent & vertical SaaS seed pitch video brief

Purpose: Explain the broken manual workflow, how your AI agent or vertical SaaS executes the job end-to-end with human-in-the-loop guardrails, bounded pilot metrics, and your seed round ask in 60-90 seconds.

Target buyer and high-frequency trigger: [e.g., Freight broker operations leads handling 400+ carrier rate confirmations per day]

Manual status-quo bottleneck and error cost: [e.g., 18 minutes per load spent copying PDFs into TMS; 6.4% detention billing errors]

3-step agent / workflow execution: [Step 1: Ingest document/event -> Step 2: Deterministic verification & exception flag -> Step 3: One-click writeback to system of record]

Guardrails and accuracy boundary: [e.g., Confidence threshold < 94% routes to human queue; zero autonomous payment release without supervisor approval]

Verified pilot or benchmark evidence: [e.g., Across 9 regional brokerages in Q3 2026, processing time dropped from 18 min to 45 sec with 99.1% field accuracy]

Business model and unit economics: [e.g., \$1,800/month platform fee + \$0.35 per processed load; 82% gross margin after inference cost]

Seed ask and 18-month milestone: [e.g., Raising \$2.2M Seed to complete 3 ERP native connectors and reach \$1.5M ARR across 60 customers]

## Suggested 75-second story order:

- 00-12s: Show the exact document or screen where the manual workflow breaks today.
- 12-35s: Walk through the 3-step agent execution on real interfaces (input -> verification -> system writeback).
- 35-55s: State the guardrail boundary and show verified pilot metrics with customer count and timeframe.
- 55-75s: State the pricing model, seed round terms, and dated next step for investor diligence.

Before you share: Do not claim "100% autonomous replacement." Show the exact human-in-the-loop verification screen so technical investors trust your production readiness.

## Turn your PDF, PPTX pitch deck, or brief into a 30-180s narrated business video

Upload slides or documents at Axiom Lab for free material analysis before production:
